LIFEWEAR TECHNOLOGIES, LLC

A LEGACY OF SPORTS
MEDICINE EXCELLENCE

Founded in 1974, LifeWear Technologies, LLC is a pioneer in the Sports Medicine industry. We began as a leading manufacturer of top-quality products serving athletic trainers, institutions, sporting goods retailers, and professional teams across the United States. Our commitment to innovation quickly established us as a prominent force in the sporting goods market.

Expanding our horizons to meet the growing demands of the first aid and pharmacy sectors, we introduced elastic bandages, athletic tape, and advanced hot and cold therapy products. Our vision was to become a comprehensive one-stop solution for private label and branded sports medicine. Today, we are a trusted partner, providing both private-label and branded Sports Medicine solutions widely available in chain drugstores, grocery stores, and mass retailers nationwide.

CleanPrene

The first-ever braces made from biobased, recycled, and sustainable materials

DO GOOD.
FEEL BETTER.
DO GOOD.
FEEL BETTER.
DO GOOD.
FEEL BETTER.

My Splint

Heat activated thermoplastic custom-fit braces

CleanPrene

CleanPrene braces combine performance with sustainability. Engineered with BIO II Foam, a USDA Certified Biobased Product, these braces offer exceptional durability, support, and compression without sacrificing eco-friendliness. Machine washable and built to last, CleanPrene meets the highest orthopedic standards while minimizing environmental impact.

By harnessing the power of advanced biobased technology, we're providing effective orthopedic support that's better for you and the planet.

MySplint

MySplint custom fit splints are designed to provide a precise, tailored fit to your unique shape, size, and application needs.

THERMOPLASTIC TECHNOLOGY

MySplint is crafted from advanced proprietary thermoplastics. This innovative material softens when heated and solidifies into a custom shape upon cooling. Featuring a three-layer composite structure, each MySplint can be easily molded to your body's contours by heating it in a microwave. It hardens to its new custom shape on cooling, providing a personalized and comfortable fit.

WRIST SPLINT

Designed to alleviate pain associated with carpal tunnel syndrome, arthritis, and other wrist conditions, the CleanPrene Wrist Support provides targeted relief and stability. This splint features adjustable top and bottom flaps with recycled hook-and-loop closures, allowing for a customizable fit. The center strap enables precise control over compression and support levels. The CleanPrene Wrist Splint is versatile, fitting either the left or right hand.

Size: Universal

ELBOW SUPPORT

CleanPrene Elbow Support is ideal for addressing soreness, stiffness, weakness, or injuries in the elbow and arm. Featuring two adjustable straps, this elbow brace allows for personalized sizing and compression, providing light to moderate support as needed. It is designed to fit either the left or right arm.

CleanPrene

Size: Universal

KNEE WRAP

CleanPrene Knee Support is designed to alleviate pain associated with soft tissue injuries and inflammations, also protecting the knee as a prophylactic support during sports activities and exercises. It has a wrap-around design for easy application and removal. Equipped with dual adjustable straps, this knee brace offers customizable compression and reliable functionality. Open patella design ensures the proper tracking of the patella bone.

Size: Universal

ANKLE WRAP

CleanPrene Ankle Support is expertly designed to provide optimal support and relief for sore, sprained, weak, or injured ankles. This ankle support features dual straps for customized compression, ensuring a secure and tailored fit. Its innovative adjustable sizing accommodates various foot dimensions, while its slim profile allows it to fit comfortably under most footwear. It can be used on either the right or left foot.

OA OFFLOADER KNEE BRACE

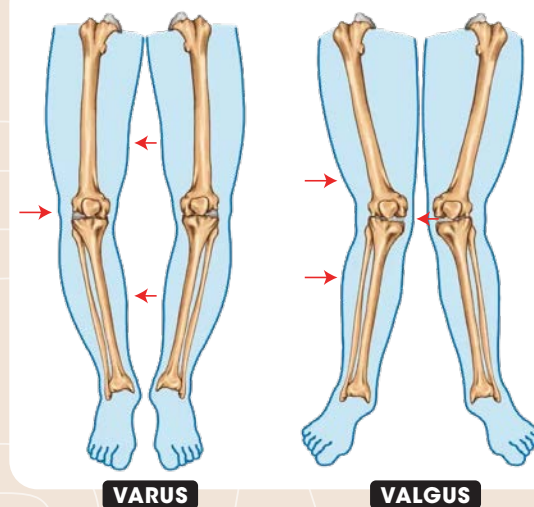

The LifeWear OA Offloader Knee Brace is designed to alleviate the discomfort associated with varus and valgus knee malalignments, which can trigger joint issues such as unilateral osteoarthritis. This brace effectively reduces pressure on the affected side of the knee, providing significant pain relief and improving mobility for patients with conditions like severe, medial, or lateral osteoarthritis.

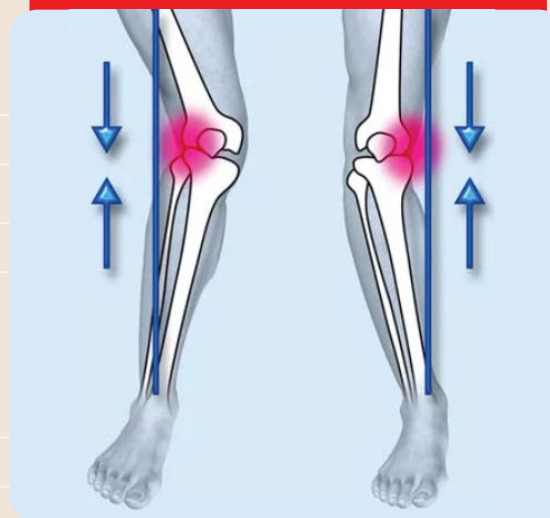

BACK INTO ACTION AND KEEP MOVING!

In Varus deformity, extra pressure is placed on the inner side (medial) of the knee, while in valgus deformity, extra pressure is placed on the outer side (Lateral). This uneven pressure wears down the cartilage, leading to osteoarthritis, which causes pain and stiffness in the knee.

What is Varus & Valgus of Knee?

How Varus & Valgus of Knee lead to Osteoarthritis?

HOW DOES THE LIFEWEAR OA OFFLOADER KNEE BRACE WORK?

The top and bottom straps plus the Allen Key adjustable hinge help to shift weight away from the damaged area. The hinge mechanism adjusts to provide support and align the knee correctly, reducing pressure on the affected side (either medial or lateral). This three-point pressure system helps to relieve pain and improve mobility by offloading stress from the affected area.

FEATURES OF OA OFFLOADER KNEE BRACE

Easy Allen key-operated offloading mechanism

Varus and Valgus relief can be adjusted easily

Adjustable thigh and calf shells

Ensures improved fit

Double-layered condylar pad and soft padding

Ensures a high level of comfort and avoids skin abrasions

Adjustable straps

For proper fitment

HINGED KNEE BRACE (NEOPRENE)

LifeWear Hinged Knee Brace (Neoprene) has Medio-Lateral Bi-Axle Hinges that provide stability for the knee, ensuring secure support during movement. Its open patella design, complemented by a soft pad, promotes proper tracking of the patella, enhancing overall knee function. Crafted from neoprene material, the brace offers both comfort and heat retention, aiding in therapeutic warmth. The wrap-around design allows for easy application and removal, making it convenient for users to wear and adjust as needed. LifeWear Hinged Knee Brace (Neoprene) can be ideally indicated for mediolateral instability, post-operative conditions of the knee, and ligament injuries.

LWF06

LACE-PULL BACK BELT

UNIQUE LACE-PULL SYSTEM THAT ALLOWS FOR ADJUSTABLE COMPRESSION

LifeWear Lace-Pull Back Belts are designed to provide stability and alleviate muscle-related pain in the lower back. These belts typically feature a unique lace-up system that allows for adjustable compression and support.

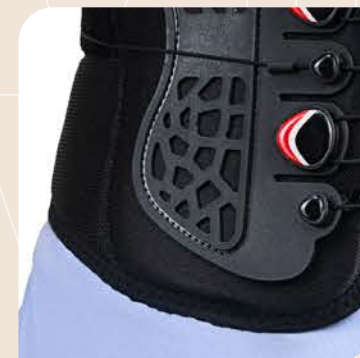

ADJUSTABLE COMPRESSION

The Lace-Pull mechanism with pulleys enables users to easily adjust the level of compression and support according to their comfort and needs. This customization helps in providing targeted support to the lumbar region.

ENHANCED STABILITY

LifeWear Lace-Pull Back Belt include additional plastic flapper and semi rigid stays to enhance stability and prevent unwanted movements.

COMFORT

Made from breathable and flexible mesh fabric material, LifeWear Lace-Pull Back Belt ensures comfort during prolonged wear. The design typically minimizes bulk, allowing for discreet wear under clothing.

LWA02

Size: S|M|L|XL|XXL

CONTOURED BACK SUPPORT

4 ANATOMICALLY DESIGNED METAL STAYS

LifeWear Contoured Back Support features four anatomically designed metal stays that provide firm support to the spine, enhancing stability and reducing discomfort. Additional tension straps allow for custom compression. Crafted from soft elastic material, the belt ensures discreet wearing under clothing, making it suitable for daily use. Ideal for managing both acute and chronic low back pain, as well as post-operative conditions.

LWA21

Size: S|M|L|XL|XXL

LUMBO SACRAL BELT

LifeWear Lumbo Sacral Belt features five flexible plastic stays with foam padding to provide comfortable spine support. Additional tension straps allow for custom compression, ensuring a personalized fit. Made from breathable elastic material, the belt offers a snug fit. It is ideal for managing mild to moderate low back pain.

LWA09

Size: S|M|L|XL|XXL

ABDOMINAL BELT

LifeWear Abdominal Belt is crafted from durable, high-quality elastic material in a one-piece construction for optimal support and longevity. Ideal as a post-operative or post-delivery aid, it effectively binds surgical incisions to improve healing and can also be used to compress the bulge or tone abdominal muscles. The semi-rigid plastic splints prevent the belt from rolling over.

LWA14

Size: S|M|L|XL|XXL

HERNIA BELT

LifeWear Hernia Belt is designed to provide comfortable compression to get relief from reducible inguinal hernia conditions.

- » Anatomically shaped foam pads ensures constant and gentle pressure on the hernia
- » Soft foam padded material ensures comfortable wearing
- » Hook and loop straps for easy application and removal

Size: Universal | Spl. Size

TAYLOR'S BRACE SHORT & LONG

LifeWear Taylor's Brace is engineered to provide comprehensive support and stabilization for the entire spine. This lightweight brace encompasses the dorsal, lumbar, and sacral regions, ensuring the spine remains in a neutral alignment.

- » Rigid and anatomically contoured metal stays ensure immobilization, support, and proper posture of the spine
- » Soft shoulder straps with padding ensure a firm grip and fitting
- » The soft abdominal wrap holds the brace in position
- » Additional Elastic Lumbar Sacral Strap for extra reinforcement

LWC04

Size: S|M|L|XL|XXL

CLAVICLE BRACE

LifeWear Clavicle Brace is designed to provide stabilization in clavicle bone fractures. It offers ideal comfort and support while promoting proper alignment which improves healing.

- » Soft and thick underarm pads prevent excess pressure
- » Hook and loop straps with strong buckles enables easy application and tightening of the product
- » Soft foam fabric avoids skin abrasions

LWC16

Size: S|M|L|XL|XXL

POSTURE BRACE

LifeWear Posture Brace is designed to apply the correct force to maintain the natural posture during daily activities and long sitting. The compact design enables snug fitting and thereby discreet wearing.

- » The wide plastic stay on the back and shoulder straps exert correctional force to maintain proper posture
- » Soft and thick shoulder pads redistribute pressure
- » The breathable material enables comfortable wearing
- » Compact design for discreet wearing

Size: S|M|L|XL

ANKLE BINDER

LifeWear Ankle Binder is designed to provide compression, support, and warmth around the ankle for pain relief and prophylactic support during day-to-day activities. It has an additional elastic strap for extra compression and support.

- Made of soft and four-way stretchable elastic material for comfortable compression during movements
- Additional elastic strap provides extra compression and support
- Anatomically designed to avoid slipping and bunching

LWD04

Size: S|M|L|XL

ANKLE SUPPORT

LifeWear Ankle Support is designed to provide compression, support, and warmth around the ankle for pain relief and prophylactic support during day-to-day activities.

- Made of soft and four-way stretchable elastic material for comfortable compression during movements
- Anatomically designed to avoid slipping and bunching

LWI08

GEL EXERCISE BALL

Resistance Level - Medium
LifeWear Gel Exercise Ball is designed for resistance training of fingers and wrist. It can be ideally used in post-operative recovery, physiotherapy, grip training, stress relief, etc.

LWJ01

WEIGHT CUFF

Weights: 0.5kg, 1kg and 2kg
LifeWear Weight Cuffs are designed for muscle strength exercises. It helps to improve strength in post-operative and injury conditions of limbs. It is an ideal aid for at-home strength training, gym training, and physiotherapy.

LWI01

Size: S|M|L|XL

SILICONE HEEL CUSHION

LifeWear Silicone Heel Cushion is designed in the anatomical shape of the heel for comfort. It has shock-absorbing quality with air suspension.

LWI02

Size: S|M|L|XL

SILICONE INSOLE

LifeWear Silicone Insole is designed in the anatomical shape of the foot for comfort. It has a slightly contoured arch for arch support. This soft insole can be ideally indicated for Fat Pad atrophy, General Aches, and Pain, Foot Fatigue, Plantar Fasciitis.

CryoMAX

POINTS OF COLD TECHNOLOGY

CryoMAX® "Points-of-Cold" Technology is the most advanced cold therapy on store shelves today – a patented, science-based system that utilizes non-toxic, latex-free materials and works for up to 8 hours at doctor-recommended therapeutic temperatures. This technology is uniquely configured not as a solid block of frozen liquid, but as small, rounded, frozen water-filled capsules arranged in rows and separated by space in which a non-toxic, non-freezing formula allows for body-conforming applications. Unlike conventional cold packs that temporarily mask pain and inhibit healing by freezing underlying tissue and blood vessels, CryoMAX® ice packs for injuries absorb heat and pain without interfering with the body's natural healing processes. Simply put, CryoMAX® "Points-of-Cold" is the most advanced cold therapy technology on store shelves today.

HOT & COLD THERAPY

The human lifestyle is undergoing a major shift. Physical conditions that were unheard of a few years back have now become common due to the prevalence of fast-paced and sedentary lifestyles. Today orthopaedic conditions have become very common across all age groups and patients are witnessing common problems such as backache, neck pain, and knee pain, which are generally lifestyle problems.

PAIN MANAGEMENT

Pain management is a wide spectrum of methods to prevent, manage, and treat pain. These methods include the usage of medications, cold and hot therapy, etc.

COLD THERAPY

It is also known as Cryotherapy which works by reducing blood flow to a particular area, which can significantly reduce inflammation and swelling that causes pain, especially around a joint or a tendon. It can temporarily reduce nerve activity, which can relieve pain.

ThermalMAX

LONG-LASTING THERAPEUTIC HEAT

ThermalMAX Reusable heat pack stays hot for over two hours when used as directed, providing effective comfort and relief from pain. It comes with a wearable wrap and strap for convenient use during everyday activities.

HOT THERAPY

Hot therapy or hot fomentation works by improving circulation and blood flow to a particular area due to increased temperature. Increasing the temperature of the afflicted area even slightly can soothe discomfort and increase muscle flexibility.

LWJ10

Size: Regular

ORTHOPEDIC HEATING BELT

- 4 layers of soft insulation with an imported long-lasting heating coil
- Soft slide illuminated temperature controller with 3 preset heat levels
- Snap action twin thermostat to prevent overheating
- Flexible design which can be used on any affected area
- Maximum temperature setting of 80 degrees C
- Best for dry heat treatment
